EDUCATION

University of California, Santa Barbara

June 2026

B.S. Statistics and Data Science

- **Technical Coursework:** Big Data Analytics, Statistical Data Science, Machine Learning, Time Series, Design and Analysis of Experiments, Regression Analysis, Python Computer Programming, Financial Risk

EXPERIENCE

Product Management Intern

June 2025 – Present

Cotality (Formerly CoreLogic)

Irvine, CA

- Mapped user-demanded data points against current model context protocol and semantic layer architecture to identify coverage gaps and guide product roadmap strategy. Facilitated prioritization for customer use-cases
- Led cross-functional standups across 3+ teams to spearhead a compliant product record layout, coordinating efforts until the finalized design was successfully handed off to data teams. Accomplished product goal within timeline
- Managed external logistics for beta product, coordinating user cohort selection, launching targeted magnet email campaigns, and designing and updating product FAQ and User Guide to reflect continuous updates and user needs
- Drove pivotal deliverables for stakeholder alignment by analyzing and ranking 350+ sample queries, establishing performance baselines that supported leadership presentations. Received strong leadership approval of work

Business Analyst Intern

May 2024 – Sep 2024

Croskey Real Estate and PM Systems Conference

Remote

- Automated Python and Zapier database funnel workflows, saving 50+ hours of manual data entry annually
- Designed a mobile-compatible agenda webpage, improving conference organization sentiment from 100+ attendees
- Grew newsletter to 150+ subscribers among industry professionals by producing PM automation solution videos

Digital Marketer

May 2023 – Sep 2023

Amazon Influencer Program Partner

- Managed digital marketing campaigns, driving 36K+ funnel clicks and 450+ conversions with organic content
- Scaled audience to 45K+ followers and 3M+ views, leveraging pipeline to drive a 71% month conversion increase

PROJECTS

Retail Location Analysis Cotality Blog

SQL, Google Cloud Platform, Google BigQuery

- Joined datasets with 500M+ datapoints with Google BigQuery, identifying the top 10 underserved retail markets
- Created visualization of 1k+ homes-to-stores ratios by U.S. city, showcasing underserved markets by geography
- Collaborated with marketing team to optimize leadership article as product proof-of-concept for an industry

Predicting Late Deliveries: Olist Machine Learning Analysis

R, ML Models, Data Wrangling, EDA

- Consolidated 8 relational databases, performed EDA and feature engineering to analyze 94K+ e-commerce orders
- Trained and tuned 6 machine learning models to forecast late Olist deliveries, achieving 79% predictive ROC-AUC
- Delivered strategic supply chain recommendations by translating ML model insights into actionable improvements

Forecasting U.S. Retail Sales: Time Series Analysis

R, Predictive Analytics, Data Science

- Analyzed 350+ months of U.S. retail data, resolving non-stationarity via log transformations and differencing
- Forecasted 2026 consumer spending patterns by developing a SARIMA model on AIC/BIC criteria

TECHNICAL SKILLS

Languages: SQL, R, Excel, Power BI, Tableau, Pendo, Visual Studio Code, Git, Jira, Confluence, Python, Figma

Personal: Strategic Thinking, Product Intuition, Stakeholder Communication, Prioritization, Receptive Attitude
